Application Monitoring with Grafana and OpenTelemetry

Script running
curl in a loop

Hello World
Application

Greeting
Service

GET http://localhost:8080/

GET http://localhost:8081/

"Hello, World!"

"Hello, World!"

Tracing

hello-world-app

span.kind = "server"

span.kind = "internal"

span.kind = "client"

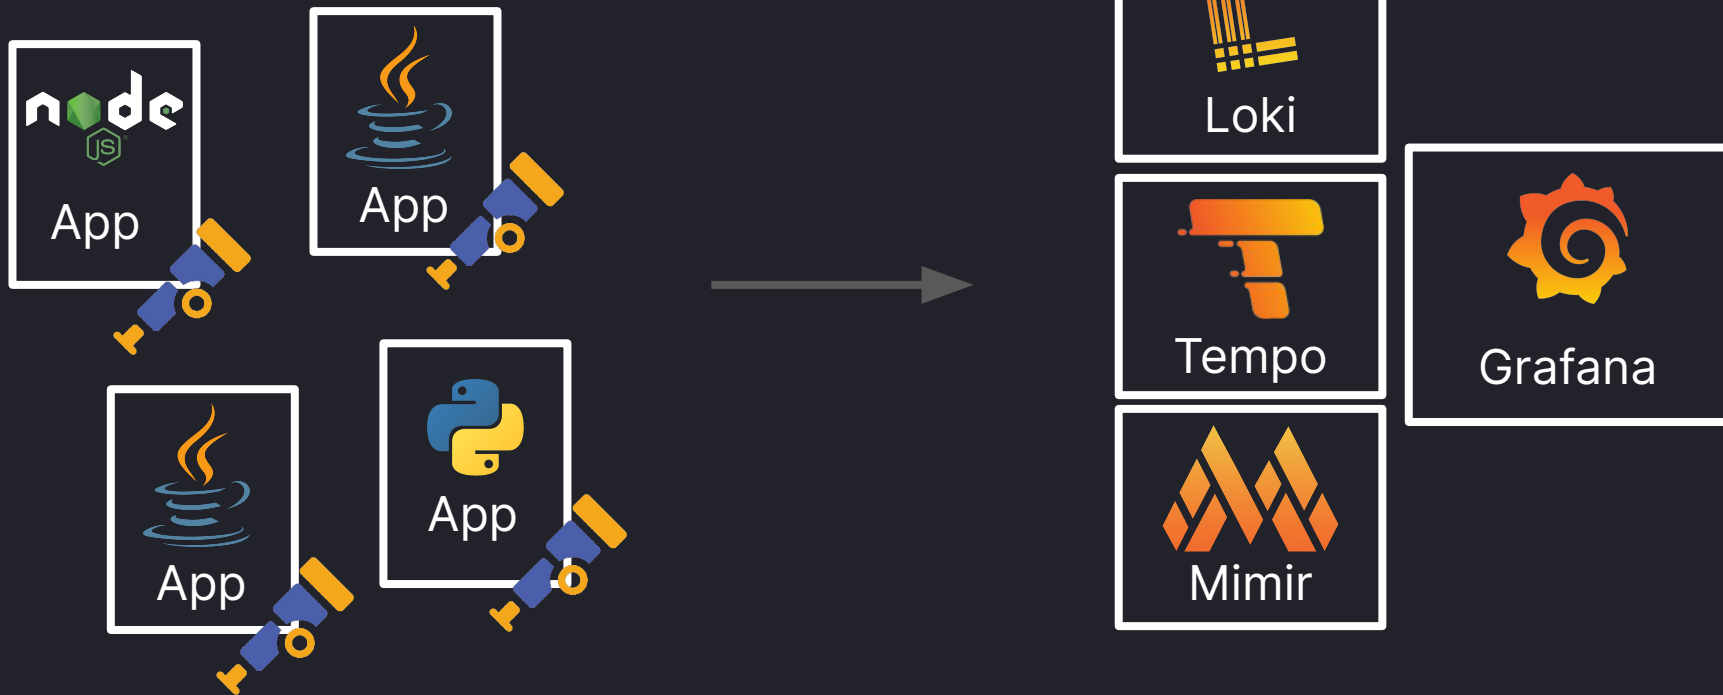

greeting-service

span.kind = "server"

span.kind = "internal"

Application Monitoring with Grafana and OpenTelemetry

Thank you!
